Theoretical Computer Science
Logic, semantics and theory of programming

Volume 187, Numbers 1–2, 15 November 1997

Computer Algebra

Guest Editors: J. Calmet
A. Carrière

Abstracted/Indexed in: ACM Computing Reviews, Compuscience, Computer Abstracts, Current Contents: Engineering, Technology & Applied Science, Engineering Index/Compendex, INSPEC Information Services, Mathematical Reviews, Zentralblatt für Mathematik

Contents

Foreword

J. Calmet and A. Carrière 1

Contributions

W. Geiselman and F. Ulmer
Constructing a third-order linear differential equation 3

E. Hubert
Detecting degenerate behaviors in first order algebraic differential equations 7

W. Fakler
On second order homogeneous linear differential equations with Liouvillian solutions 27

G. Thomas
The problem of defining the singular points of quasi-linear differential-algebraic systems 49

E. Pflügel
On the latest version of DESIR-II 81

C. Scheen
Implementation of the Painlevé test for ordinary differential systems 87

L. Bernardin
On square-free factorization of multivariate polynomials over a finite field 105

W.A. de Graaf
An algorithm for the decomposition of semisimple Lie algebras 117

A. Makhlouf
Algèbres associatives et calcul formel (Associative algebras and computer algebra) 123

C. Zenger
Indexed types 147

D. Mall
Covers and fans of polynomial ideals 167

B. Amrhein, O. Gloor and W. Küchlin
On the Walk 179

J. Karczmarczuk
Generating power of lazy semantics 203

J. Calmet and K. Homann
Towards the Mathematics Software Bus 221

J. Korelc
Automatic generation of finite-element code by simultaneous optimization of expressions 231

A. El Hamidi and M. Garbey
Using MAPLE for the analysis of bifurcation phenomena in gas combustion 249

A. Carrière and L.-R. Oudin
Applications du calcul formel à la balistique 263

Author index volume 187 285
